Mon Apr 10 Meeting

Nikita: We are working on testing this week so have the login page and the database set up for the lab.

Nikita: Create a milestones folder where you include your plan for next week.

Nikita: Everybody make sure that you clone the repository and have access to make changes.

Nikita: Can I see your project board?

River: We added the epics and important tasks.

Nikita: Does everybody have at least one thing assigned to them?

Berkley: Yes

Nikita: Make sure that you pick up at least three things from the project board per week. This week will be coding, everybody has to have at least 3 commits per week.

River: Where can you check commits?

Nikita: Go to insights then contributors to see the number of commits

Nikita: Don't just make random commits. Learn what is good coding practice. If you do a lot of code or less it doesn't matter.

Nikita: You need a project milestones folder with your plan for the next week and what you did over the past week.

You will find the projects tabs more helpful later.

Just for attending the meeting you get 5 points.

Updating your cards in the project is 5 points.

Individual contribution is 5 points.

Plan for the following week is 5 points.

Nikita: What is your project?

River: We are working with the spotify API to give users insights into their listening.

Berkley: Our plan for the for the next week is to create the login and registration and create the connection with spotify. We also want to develop a base HTML for the reports page.

Nikita: Can you show me your wireframes?

Can you make the wireframes more clear with all of the visual things that you want it to look like. It should be a good sketch of what you want the page to look like with the layout included and any buttons or features also present.

If you need help you can come to office hours tomorrow.

Make sure you have everything ready for the next meeting.
